

THE WILLIAMS WATERSHED

Williams, Oregon is a small community nestled in the ecologically diverse Siskiyou mountains in Southern Oregon. This community is surrounded by 30,000 acres of forest lands.

Once a logging and mining town, it now is the home to numerous family-owned and operated farms (many of which are certified Organic) growing vegetables, seeds, and herbs for national and international markets.

WILLIAMS COMMUNITY FOREST PROJECT

WCFP is a ecological non-profit organization. We promote and advocate for the Williams watershed and Oregon ecosystems, following science-based studies through education, recreation, and activism.

We are a 501 (c) (3) organization.

All Donations are tax deductible.

WHAT WE DO

Protect Pipe Fork

Pipe Fork is an Old Growth Habitat in Southern Oregon. WCFP works to conserve this legacy forest and its clear waters for future generations.

Protect Penn Butte & Late Munger Wildlands

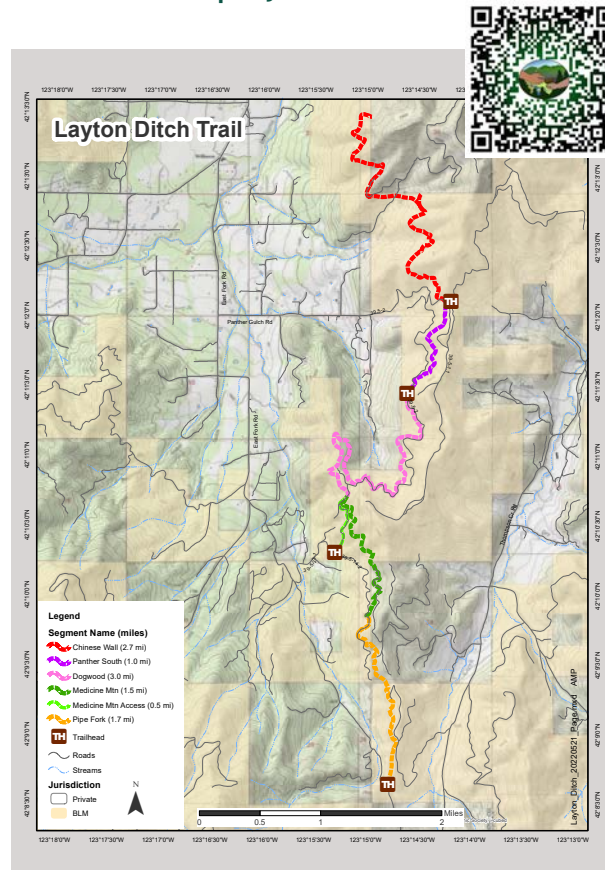

BLM is currently proposing a large timber sale on Mungers Butte. Our coalition is working to both protect the Mungers Wildlands and stop the Late Mungers Timber Sale.

Maintain the Layton Ditch Trail

WCFP has been maintaining the Williams historical Layton Ditch Trail since 2014. We host monthly work parties. Check out our Community Event Calendar for the next work party!

Manage the Forest Watch Project

Meet Tyanna!
The Forest Watch Program was created to stay informed on current land use treatments and conduct forest monitoring surveys within the Williams watershed.

Over the last few months, Tyanna has discovered many discrepancies with agency data versus current conditions, as well as possible legal violations. She informs the community of her findings and encourages dialogue and decisions that have the best interests of the residents of the surrounding community.

If you would like to become a part of an active group of forest and water defenders please consider volunteering or donating to our work. Funding covers hourly salary, monitoring gear, and equipment.
